

## ICAR 2008

16th International Congress on Animal Reproduction  
13-17 July 2008  
Budapest – Hungary  
[www.icar2008.org](http://www.icar2008.org)

The Hungarian Society for Animal Reproduction and the Local Organising Committee cordially invite you to participate in the 16th International Congress on Animal Reproduction to be held 13-17 July 2008 in Budapest, Hungary.

An interesting and varied social program will enhance the opportunities for delegates to network with associates as well as to enjoy the Hungarian cultural heritage. Fascinating pre- and post-conference tours will be arranged to highlight the best what Hungary has to offer. Furthermore, registered accompanying persons are warmly welcomed to join the special programs and tours organized for accompanying persons and also to join the social events of the congress.

The theme of the congress is animal reproduction, including animal physiology, animal pathology and reproductive technology. The successful ICAR Congress – held in every four years – is a world-class event and exhibition that attracts more than 900 international scientists and practitioners who want to keep current on the latest issues of animal reproduction.

The detailed scientific program of the plenary sessions and symposiums is available on the website of the congress. You also find there the call for abstracts. Please also have a look at the information about registration fees, hotel reservation, pre- and post-congress tours and social activities.

If you are interested in the future progress of organisation, you just have to give your contact information via the website and we will keep you informed.

Looking forward to meeting you in Hungary in 2008,

Professor Dr. László Solti, president of the Local Organising Committee
